

## Inside Track: Sabre Releases Automated Security Tools

JULY 23, 2007 -- Sabre Travel Network today is announcing the launch of its new Traveler Security and Data Suite. The application provides buyers and agencies with traveler-tracking and reporting tools using Sabre air, car and hotel reservation data of up to a year for pre-trip and three years of post-trip information. With no additional fees related for housing or retrieving data, the suite can be purchased as a separate product or as a component to Sabre's recently released mid-office tool set ([BTN, May 7](#)). The product is being used by a beta group of agencies, including Dedham, Mass.-based **Colpitts World Travel** and corporations including Indianapolis-based Thomson.
